

Port Guide for Cloud & DevOps

Essential Ports Every Engineer Should Know

Web & Application Ports

80 - HTTP — Normal website traffic

443 - HTTPS — Secure encrypted web traffic

8080 - HTTP Alt — App servers

8443 - HTTPS Alt — Secure admin/API

Remote Access Ports

22 - SSH — Secure login to Linux

3389 - RDP — Windows remote access

Networking Ports

53 - DNS — Name → IP resolution

67/68 - DHCP — Assign IP addresses

123 - NTP — Server time sync

Email Ports

25 - SMTP — Send emails

110 - POP3 — Download emails

143 - IMAP — Read emails online

587 / 465 - SMTP Secure — Encrypted email sending

File Transfer Ports

21 - FTP — Unsecured transfer

22 - SFTP — Secure file transfer

139 / 445 - SMB — Windows sharing

2049 - NFS — Linux network files

Database Ports

3306 - MySQL — MySQL DB

5432 - PostgreSQL — Postgres DB

27017 - MongoDB — NoSQL database

6379 - Redis — In-memory cache

1433 - MSSQL — SQL Server

Cloud & DevOps Ports

5000 - Docker Registry — Stores images

2376 - Docker API — Secure Docker API

6443 - K8s API — Cluster control

10250 - Kubelet — Node agent

3000 - Grafana — Dashboards

9090 - Prometheus — Metrics

Messaging Ports

5672 - RabbitMQ — Message queues

9092 - Kafka — Data streaming
